

Corporate-based Malaria Control Programs

Improve Lives with Reliefnet Reverte Customized Imprinted Logo Nets

Create shared-value through responsible supply chain management investments in corporate-based malaria control programs

Corporate-based Malaria Control Programs can significantly reduce the number of malaria cases among employees, their families and local communities in the supply chain. Combatting malaria and other vector borne diseases such as dengue fever results in shared-value for employees, local communities, local authorities, investors and corporations alike.

Utilizing Reliefnet Reverte Long Lasting Insecticide Incorporated Nets (LLINs) Customized Imprinted nets ensure the highest level of measurable impacts from your CSR investments.

Advantages of corporate-based malaria control programs utilizing Reliefnet Reverte customized logo nets

- Decrease Employee Absenteeism - Reducing malaria and dengue fever cases among employees and their family members results in less employee absenteeism
- Increase Productivity - Healthy employees, who are not concerned about sick family members, are more productive
- Improve HSE (Health, Safety and Environment) Compliance - Working while suffering from malaria can cause serious accidents and, in worst case scenarios, fatalities in the workplace. Targeted malaria control programs reduce the risk of HSE violations
- Optimize Corporate Employee Health Care Spending - When an employee falls ill with malaria the company often bears the direct medical costs. A decrease in malaria cases can funnel spending into other primary health activities
- Increase Socio-economic Impact - Often, a large portion of the cost for taking care of an ill family member is carried at the household level. The death of a family member can result in the creation of a huge financial burden on a family. Healthy communities have increased economic resources
- Obtain Measurable Impact from CSR Investments - Customized logo nets allow corporations to brand themselves, a cause, or a partner, while improving lives!
