

Providing access to quality food parcels amidst challenges in Ukraine

Real Relief extends its commitment to making a difference by providing access to quality food parcels in Ukraine. Our dedicated team, equipped with a highly efficient and flexible packing unit, is prepared to produce customized food parcels based on your specific requirements. We can pack 55,000 parcels per week at present.

Exactly like our hygiene kits, our food parcels adhere to the highest standards, ensuring quality, care, and comfort for those who receive them. Stringent quality assurance is deployed to ensure that each parcel meets your needs.

We offer exceptional flexibility to accommodate any packaging, labeling, or specific requirements for the content of the kits. Our kit packing unit is located inside Ukraine and we strive to use locally manufactured quality food and items.

Discover how Real Relief's food parcels, NFI and Hygiene kits can contribute to alleviating migrants' needs and bringing relief to communities in Ukraine and elsewhere.
